

Symantec Enterprise Vault™ Health Check

Transam offers a health check service on currently installed Enterprise Vault systems.

Typical Enterprise Vault Issues

The Transam Enterprise Vault Health Check proactively examines your implementation's performance, functionality and value as a business tool. Typical issues may include:

- ❖ Running out of date versions and/or Service Packs not applied
- ❖ User issues – toolbar buttons disappearing, mailbox not archived or inaccessible
- ❖ Public folder issues
- ❖ Design and misconfiguration
- ❖ Performance and reliability
- ❖ Readiness for Exchange 2007 and/or SharePoint 2007
- ❖ Reviewing archiving policies
- ❖ Outlook performance issues
- ❖ Indexing issues
- ❖ Enterprise Vault Policy Manager (EVPM) script issues
- ❖ PST migration
- ❖ Backup performance issues
- ❖ Storage management issues
- ❖ Business Continuity and Disaster Recovery requirements
- ❖ End user functionality
- ❖ Licensing & renewal problems
- ❖ Handling staff leavers and replacement staff
- ❖ Deleting stubs and archived email
- ❖ Offline Vault issues

Our Approach

Analysis Phase

The first phase is for one of our Enterprise Vault consultants to work with you to:

- ❖ Understand your issues and systems and business requirements
- ❖ Perform a detailed analysis of your Enterprise Vault configuration and its entire environment

Reporting Phase

In this phase we

- ❖ Produce a detailed report documenting our findings and recommendations
- ❖ Meet with you to present and discuss our findings and recommendations

Proposal Phase

Having obtained your feedback, if required, we can produce a firm proposal together with an outline project plan and estimated costs to implement our recommendations.
