

# VMware Infrastructure Health Check

## Overview

The Transam VMware Health Check service provides an assessment of your current VMware infrastructure and examines your implementation's performance, resilience and functionality as per VMware best practices. As appropriate we will also make recommendations which will further the benefits your business can attain through your investment in a virtual infrastructure.

## Deliverables

The following deliverables will be provided with this Service:

- ❖ Present an interactive workshop to facilitate knowledge transfer on VMware best practices.
- ❖ Conduct assessment of VMware virtual infrastructure to validate current environment and identify potential areas to optimize configuration and improve performance.
- ❖ Produce a report outlining our assessment of the current environment and any recommendations
- ❖ Having obtained your feedback, if required, we can produce a proposal together with an outline project plan and estimated costs to implement our recommendations.

## Our Approach

- ❖ Review with relevant personnel your current architecture, discuss any potential issues you may be experiencing and understand your business requirements
- ❖ Perform a detailed analysis of your VMware configuration and its entire environment including, as applicable:
  - Virtual infrastructure technical architecture review
  - ESX Server configuration
  - VirtualCenter configuration
  - Virtual machine distribution
  - Virtual network configuration
  - SAN/storage Allocation
  - Disaster recovery and backup for virtual infrastructure
  - Performance
  - Security
  - Monitoring
- ❖ Produce a detailed report documenting our findings and recommendations and if required produce a proposal to implement our recommendations

## Transam's Qualifications and Experience

- ❖ VMware Enterprise Partner
- ❖ Experience with designing, implementing and supporting VMware systems in diverse environments
- ❖ We also offer a number of associated products and services in relation to proof of concept installations, capacity planning service, physical to virtual migrations, storage solutions, business continuity and disaster recovery.
